Vesta Corporation Awarded Laureate for Advancements in Fraud Management Technology at 2002 Computerworld Honors Program

Vesta's case study joins an international archive available to over a billion people

Portland, OR – Vesta Corporation has been recognized as a Laureate at the 2002 Computerworld Honors Ceremony for advancements in technology that are beneficial to humanity. Nominated by Morgan Stanley, Vesta was recognized for their work in card not present (CNP) transactions and fraud management.

“This group of Laureates achievements have been deemed exemplary” said Dan Morrow, Executive Director, Computerworld Honors. “They have been selected because they provide an invaluable resource for future generations throughout the world.”

Vesta's case study joins an archive collection of this year's 315 Laureates and all past honorees including companies such as Master Card, Yahoo, Microsoft and CNN. The archive is a one of a kind source for research and study of the technological revolution is available to over a billion people via the Internet at www.cwheros.com. This collection, which has over 4000 case studies, video tapes, oral histories, biographies, conference proceedings, publications, and other records generated by the top innovators in the world, is a one of a kind source for research and study of the technological revolution and is available to over a billion people via the internet at www.cwheros.com.

“To be included in this group of laureates is a great honor and achievement for Vesta,” said Douglas Fieldhouse, president and chief executive officer at Vesta Corporation. “This award validates Vesta's unique approach to fraud management and the impact it has in protecting both consumers and businesses.”

About Computerworld Honors

The Computerworld Honors program was founded fourteen years ago in a joint venture of the international data group and the Smithsonian. The program brings together the

Chairmen or Chief Executive Officers of the one hundred foremost information technology companies in the world to help the world's leading universities, libraries and research institutions document a revolution in progress, the global information technology revolution. In April of each year, these organizations are recognized as Computerworld Honors Program Laureates in formal [ceremonies](#) marking the donation of their case-studies and other historic materials to the world's libraries. For more information on the Computerworld Honors Program visit www.cwheroes.com.
